Persons of Consumptive Habits, Read This!

TO THE GREEF NEURG COMPANY : For the first time in my life am induced to cert fy to the truly wonder-ful effects of a popular medicine, but in sensing you the certificate I feel that I am only discharging a duty that I owe to the stratement Company, and more especially to suffering bemanity.

Atout the first of June last I had a negro man taken with a Cough, attended with restlessness, spitting of blood and other darg most symptoms of consumption. I immediately called in a truly skiful and scientific physician, who told me it was a case of con umpton. He treated him for Asseral weeks but he gradually graw worse. I then had another physician of great reputation in 1 ng di cases. He examined him, and a roccided it to be a hope ers case of cens mptlen, and said it was uncless to spend money in try ing to care nam.

I had previously promised the Graeenberg Agentshere, (Messrs Wels & loved,) that when the doctors gave him up I would try the Graeenberg Consumptive's Balar. I did so and to my age, cable surprise, the man began to to prove after taking only five or six doors. He took only two buttles

of the Bann and three bottles of the Graefenberg Sarsapar 1 Compo not, which cost me the small sum of nine dollars, and to-day I consider him entirely cared. He is worth \$1,200, and he is doing me good ervice on the plantation i consider him perfectly round and we I as he is fat, hearty and strong, without a vertige or rigal of disease left.

JOHN MYELS, I have used the Creef nberg Consumptive's Balm in severe cases of a onsumption, in my practice, with the happiest effect. I wish all would use i.

S. MEDARIS, M. D.,

THE GREATEST INVENTION OF THE AGE. West's Patent Galvanic Cement For Roofing.

The subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had ceintifie men experimenting, and that it has been the study of Architects and Builders, for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the people wish. The contraction, expansion and rusting of metal roofs, are so great in changeable climates, that they become useless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become crumbly, and worthless; whereas, the inventor of the Galvanic Cement, has labored twenty years to combine articles to obviate those difficulties, and can testify from his long experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best aticler ever before known. The combination of this Cement is such that it is calculated for entire new roofs, flat or steep, covering over old chingles without removing them; lining cave-troughs, seaming around battlements, chinneys and sky-lights. Covering car-tops, steamer-decks, e.c. This Cement, by its non-conduction and galvanism, prevents metal roofs from rusing and unsoldering, and resists the extremes of heat and cold, better than any thing ever invented, for entire roofs or for covering metal and the out side of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the right to the State of

pearance is like slate; beautiful for the rich palace or the humble cottage.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territors, by Coenties or Towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at short notice.

This Roof is now being put on in this city, for the benefit of all concerned, and warranted to excel all other modes of Roofing. The subscriber has 1 ad his mode of Roofing tested as to its qualities, during the last year and a half in the city of Memphis, which has proved satis actory, to which a number of the nost prominent citizens can testify.

W. S. BENNETT, Proprietor. Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, and writer upon Architec-Sloan, the celebrated Architect, and writer upon Architecture, whose experience with this mode of roofing, without a doubt, is satisfactry to all.

MEMPHIS, March 12, 1857.

Ma. W. S. Bennert.—When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Sloan Work on Architecture. I asked his opinion as to the durability. Ac., of West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and is all that its advocates claim it to be: farther saying that he is using it on a fine building for himself. Respectfully.

JOHN L. MORGAN, Architect.

OFFICE OF MISS. CENTRAL & TENN. R. R. Co., This will certify that the M. U. & T. R. R. Co. have purchased of Mr. W. S. Bennett, the right to use on their Cars, Bridges, Buildings, &c., &c., West's Galvanic Cement. Having seen it used and tested, I have no hesitation in recommending it to be the best and cheapest covering now in use.

ENGINERA'S AND GEN'L SUP'T'S OFFICE, MEMPHIS & CHARLES-TON RAILBOAD. To Whom it MAY Concenn.—This is to certify that the Memphis and Charleston Railroad Company have purchased of W. S. Bennett, the right to prepare and use upon their Depots Buildings, Cars. &c., &c., West's Galvanic patent fire and water proof Roofing, and that we believe it to be an economical and durable covering, having already had it in use for eight months.

F. C. ARMS, Gen'i Supt. W. S. BENNETT, FSQ.—Dear Sir.—The facts within our knowledge of the durability, &c., of West's Galvanic Cement; are these; The building you covered for us last we can therefore recommend it to the public for all roofing purposes; as a light, cheap, fire and water proof roof. It does not get soft and run from the effects of the heat of the sun; nor does it harden and crack from the effects of the cold. Any persons wishing to know more of this ar-ticle, can call at our manufactory. N. S. BRUCE & CO., Carriag: Manufactory, Monroe St., Memphis, Tenn.

MEMPHS, TENN., Dec. 8th, 1855. To WHOM IT MAY CONCERN.—This is to certify that W. S. Bennett covered two roof- for me last spring, with a com-

position called West's Patent Galvanic Cement one of them was a new deck, the other an old shingle roof, which then was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dormer window, which leaked badly, and had balled the skill of Carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most cheerfully recommend his mose of roofing to the public, for all roofing purposes, and believe it to be a permanent fixture against fire and water.

D. COCKRELL,

Proprietor Commercial Hotel.

EUPERINTENDENT'S OFFICE, MEMPHIS & OHIO R. R.

MR. BENNETT,- Dear Sir:-Our company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and so far as my knowledge extends, I can cheerfully recommend it to any who wish a dry roof of any sort.

H. COFFIN, Superintendent. dry roof of any sort. MEMPHIS, TENN., Jan. 14. 1857.

To THE PULLIC.—W. S. Bennett, made a plication to us last summer to cover our buildings with West's Galvanic Cement; it being a new thing, we thought we would try it;

had it applied to our Blacksmith Shop, and Engine House

attached to the Fo indry. They have proved all required of a water proof roof, having withstood some of the greatest storms, and are giving good satisfaction. We can only add, try it and you will be satisfied.

CURTIS & KNAPP, Iron Founders. MEMPHS, Jan. 14, 1957

TMr. Bennett, has done some small amount of roofing for me in his peculiar way, with Cotton stuff, coated with a preparation the basis of which appears to be a Coal Tar. It is a very effectual and light roof, and appears to promise considerable durability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the influence of the air and water. The Composition does not liquify and run from the effects of the heat of the san in augment; nor does it harden and crack from the

sun in summer; nor does it harden and crack from the influence in the cold of winter,

TRABUE & LUCUS. PATENT ELASTIC FIRE & WATER-PROOF

CEMENT ROOFING. THE undersigned is prepared to introduce into use in Tennessee W. E. CHILDS & CO.'S PATENT ELASTIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Companies, and the public to examine its superiority over other Roofing. ARCHITECTS AND BUILDERS should not fall to ARCHITECTS AND BUILDERS should not fail to examine this Roofing, as it is better and cheaper than any thing in use. The materiel forms a hard and smooth surface that will resist the action of the atmosphere in every climate. It is impervious to water, clastic, and flexible. It contracts and expands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good sheathing, old shingles, tar and gravel, tin, sinc, copper, or iron roofs—it making no difference how steep or flat they may be—for seven dollars per one hundred square feet; it being far cheaper than any Roof of the old style, and we are sure it will give better satisfaction.

cheaper than any Roof of the old style, and we are such will give better satisfaction.

It will also be found to be the best thing ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys, scuttles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. Tin Roofs can be painted over (and warranted not to leak) at two dollars and fifty cents per hundred square feet, which is cheaper and much better than the stone of the second to be the best (and warranted not to leak) at two dollars and fifty cents per hundred square feet, which is cheaper and much better than paint. This Roofing will be found to be the best then for covering large Roofs where they are exposed to fir—such as Steam Mills, Saw Mills, Factories, Rallroad Cars, Bridges, Depots, Station Houses, Steamboat Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint n it, it presents no chance for fire to communicate, and any ight substance will burn out without igniting.

The Insurance Offices at Cincinnati, and other places where Childs & Co.'s Cement has been used, insure Buildings with Roofs covered with this Cement, at the same rates as for those covered with Iron, Copper or Tin.

The Cement will be furnished to those at a distance with directions for using.

Orders sent to the undersigned, through the Postofice, will be promptly attended to

This is a purely vegetable compound, prepared on strictly scientific principles, after the manner of the celebrated Holland Professor, Boerhave. Because of its great success in most of the European States, its introduction into the United States was intended more especially for those of our fatherland scattered here and there over the face of this mighty country. Meeting with great success scrong them, I now offer it to the American public, knowing that its truly wonderful medicinal virtues must be acknowledged.

It is particularly recommended to those persons whose constitutions may have been impaired by the continuous use of ardent spirits, or other forms of dissipation, Generally instantaneous in effect, it finds its way directly to the seat of life, thrilling and quickening every nerve, raising up the drooping spirit, and, in fact, hissing new health and vigor in the system.

NOTICE.—Whosever expects to find this a beverage will be disappointed; but to the sick, the weak and low spirited it will prove a grateful aromatic cordia, presessed of singular remedial properties.
